Departmental results are represented thus:

SA = Strongly Agree, A = Agree, N = Neutral, D = Disagree, SD = Strongly Disagree, NA = Not Applicable

NOTES: 1. Departmental means and percentages have been calculated as the average of the individual course means and percentages (rather than from the individual responses for the department which would result in large classes unduly influencing the results).

2. If the number of returns is less than 10, the responses are not aggregated into the departmental mean.
3. The histogram bar represents the percentage of students rating each item.
4. The numbers quoted are actual numbers of respondents.
5. For response rates of less than 65% the results may not be representative of student opinion and should be interpreted with caution.
6. The accuracy of the scanned data depends upon the legibility of the response marks. In some circumstances a small percentage of responses may be undetected by the scanner.
